

Question 3-4

Question 3

1 point possible (graded)

Why are we getting the following error message?

```
// Icon -> Image
// produce true if the given icon is more than 30 pixels high
(check-expect (too-tall? STEP-ICON) false)
(check-expect (too-tall? RUNNING-STICKMAN-ICON) true)

(define (too-tall? i) false) ;stub

(define (too-tall? i)
  (> (image-height i) 30))
```

Welcome to [DrRacket](#), version 5.3.4 [3m].
Language: **Beginning Student**; memory limit: 256 MB.
too-tall?: this name was defined previously and cannot be re-defined
>

☐ The function should use a different name than the stub.

☒ The stub should be commented out. ✓

☐ The check-expects should be commented out.

☐ The symbol ? cannot be used in the function name.

Explanation

Since DrRacket does not let us define a function more than once, commenting out the stub is the correct fix for this problem.

Question 4

1 point possible (graded)

In the screenshot above, which other part of the function design has an error in it?

☒ signature ✓

☐ purpose

☐ examples/tests

☐ function body

Explanation

The signature should be Icon -> Boolean instead.
