Question 3

Question 3

1 point possible (graded)

Look up the documentation for `place-image`. What happens if `render-cat` is called with a number much larger than the width of `MTS`?

- ⚪ An error message will occur.

- 🔴 The cat will be rendered far off the screen, and cropped out, leaving `MTS`. ✔

- ⚪ The cat will be redered on the right edge of the screen.

- ⚪ `MTS` will stretch to accommodate the location of the cat.

Explanation

`place-image` places the given img onto the scene, and then crops the resulting image to the original dimensions of the scene.
