Question 2

Question 2

1 point possible (graded)
How would the cat behave if SPEED was -9?

- ○ It would move three times faster to the right.

- ○ It would stop moving.

- ● It would move to from right to left. ✔

- ○ It would move down.

Explanation
If SPEED is negative instead of positive, the cat's x-position will get smaller instead of bigger, and it will move from right to left.
